

STOCK EXTRUSIONS

STOCK U-CHANNELS

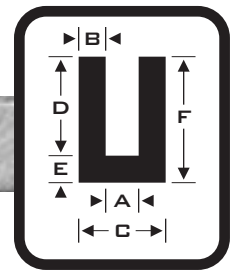

Western Rubber & Supply, Inc. stocks rubber extrusion for many applications. The standard profiles include U-Channels, P-profiles and other unique shapes. Common uses for rubber extrusion are sealing, noise control, vibration control and decorative trim. The elastomers used in our standard rubber extrusions are either weather resistant EPDM or SBR. Silicone, Neoprene, Viton and Buna-N are also available if your unique application requires a higher level of performance. Custom compounds and profiles are our specialty.
