

# SPONGE STRIPPING

*Closed cell sponge stripping can be used in many applications to help dampen vibration, control sound and seal in certain applications. Our standard closed cell sponge is made from a blend of elastomers and is available with or without adhesive. We offer a wide variety of standard sizes to meet most specifications. We also offer quick turn-around, custom widths and thicknesses for your convenience. For your unique applications which require a higher level of performance, please ask about our other elastomer options.*

PART NUMBER	THICKNESS	WIDTH	STD. ROLL LENGTH
